WCAG FOUNDER 30-MINUTE SELF-AUDIT

Schoolify Academy · P2-M4 Co-Design Adaptation Evidence

Learner Partner: Yassine (16, Dyslexia / Dyspraxia)
Context: Casablanca (Sidi Moumen) · Pre-Session M4

1. THE JOURNEY AUDITED

Core Journey: Open course link → Browse foundational module → Watch in-video quiz clip → Submit quiz answer → View feedback & AI learning gap diagnostic
Device & Network Tested: Infinix Smart 7 (Android 12 Go, 2GB RAM, 6.6" 720p screen with cracked protector) on a throttled 3G mobile data connection (Maroc Telecom Pass *3).

2. TOP 10 SCORECARD

CHECK (FOUNDER TOP 10)	HOW TESTED (MINUTES)	SCORE	NOTE (WHAT BREAKS, WHERE)
1. Contrast ≥ 4.5:1	Colour Contrast Analyser + outdoor daylight test (3 min)	Fail	Subdued grey metadata (`#94a3b8` on white = 2.4:1) and light blue quiz badges are completely invisible in outdoor glare.
2. Text survives 200% zoom	Android large font size set to Maximum (3 min)	Fail	Question text overlaps the Next/Submit buttons; container flex breaks and quiz options clip off-screen with horizontal scroll.
3. Alt text on meaningful images	TalkBack inspection of diagrams and icons (3 min)	Pass	Core instructional diagrams include clear functional labels; decorative UI vectors correctly carry empty `alt=""`.
4. Captions on all videos	Played 3 video lessons with device sound muted (3 min)	Fail	Zero captions or VTT subtitle tracks available. Video player only supports raw MP4 streams with no audio transcription toggle.
5. Touch targets ≥ 44px, spaced	Thumb tap test one-handed on bus motion (3 min)	Fail	Quiz multiple-choice radio buttons measure only 32×32px with 4px gap. Due to dyspraxia, wrong answers are misclicked repeatedly.
6. No precision-only actions	Complete journey with coarse taps; no pinch/drag (3 min)	Pass	All linear progress navigation operates on discrete single clicks; no complex drag-and-drop or multi-finger gestures required.
7. No time traps	Evaluated countdown timer on in-video quiz (3 min)	Fail	In-video quiz enforces a rigid 45-second timer with no pause, extension, or disable toggle. Yassine runs out of time reading prompt.
8. Plain language	Read instruction prompts aloud in French & Darija (3 min)	Fail	Prompts rely on dense academic French with subordinate clauses; no Darija oral translation or simplified summary is provided.
9. Errors that help	Triggered empty submission & incorrect answer (3 min)	Pass	Error state highlights the exact skipped input in red and explicitly states: "Please pick one choice to continue."
10. TalkBack test	TalkBack ON, navigated journey with eyes closed (3 min)	Fail	Screen reader announces quiz options as unlabelled "clickable view 28"; question card title is skipped entirely in DOM focus order.

3. TOP 3 FIXES (RANKED BY IMPACT FOR YASSINE, THEN EFFORT)

[POUR: Operable] · Rank 1 (Critical): Disable Quiz Countdown Timers & Expand Tap Targets to 52px. Eliminate the 45-second time trap completely by defaulting quizzes to untimed self-paced mode. Expand choice cards to full-width containers with minimum 52px height and 12px vertical spacing to prevent dyspraxia misclicks.
Backlog Action: Ship to staging for live testing in P2-M4 session. · **Target Ship Date:** November 25, 2026.

[POUR: Robust / Perceivable] · Rank 2 (High Impact): Bilingual Darija/French Audio Question Read-Aloud & TalkBack Labeling. Embed a native HTML5 audio button directly beside each question and explanation card, providing an audio-read-aloud in natural Darija and spoken French, while assigning semantic `aria-label` tags to choices to ensure screen readers announce options clearly.
Backlog Action: Enter as core fellowship accessibility adaptation for Tranche 2. · **Target Ship Date:** December 10, 2026.

[POUR: Perceivable] · Rank 3 (High Impact): **Responsive Typographic Scaling & High-Contrast Visual Mode.** Refactor the question container CSS from fixed viewport heights to fluid auto-wrapping layouts (`line-height: 1.6`, letter-spacing `+0.03em`), and bump low-contrast grey labels (`#94a3b8`) to accessible slate-800 (`#1e293b`, 9.6:1 contrast ratio) so text remains readable under bright sunlight.
Target Ship Date: December 20, 2026.
