2. SCRIPT USED & GATEKEEPER RESPONSE

Script Selected:	**Adapted Script B (Collaborative Co-Design Approach):** Introduced Schoolify Academy as a Moroccan learning platform supported by the Mastercard Foundation EdTech Fellowship, admitted that our platform currently fails dyslexic and dyspraxic students due to tight fonts, French text overload, and countdown timers, and explained that we need to learn directly alongside one student and their parent over three respectful sessions.
Gatekeeper Response:	*"Most digital apps are impossible for our kids to finish alone because of word-crowding and speed pressure. If you are here to adapt the system with them rather than test them like guinea pigs, I will personally introduce you to Yassine and his mother Amina after Saturday's support group."*
